

# Maternal Infant and Early Childhood Home Visiting Program

The MIECHV-funded centralized intake agencies serve select communities as a single point of entry into maternal and early childhood home visiting and behavioral health programs. Virginia's highly trained Central Intake Coordinators accept both self-referrals and referrals from service providers, and screen and refer clients to available home visiting and behavioral health resources in their community. The goal of centralized intake is to promote coordinated systems of care and a consistent point of entry into home visiting, and to provide early identification of pregnant and postpartum women at risk for mental health, substance abuse, smoking, and interpersonal violence.

Supported by project D89MC23543 from the U.S. Department of Health and Human Services, Health Resources and Services Administration, Maternal and Child Health Bureau (Title V, Social Security Act, Patient Protection and Affordable Care Act of 2010).

## Central Intake Project Site Listings
